

3000 SERIES

DESCRIPTION

The 3000 series is a 500mm x 250mm jaw action crusher that has the capability of crushing a full UK kerbstone in approximately 30 seconds. Instant hydraulic adjustable jaws allow output product sizes to range from 20mm up to 100mm.

Dust suppression is fitted as standard, by means of fine water spray nozzles utilising standard domestic hose pressure. These crushers are very popular with landscape gardeners, small builders/demolition companies, waste recycling, developers and the agricultural sector. The 3000 series crusher can be powered by the use of hydraulic powerpacks or any auxiliary hydraulic supply from a Tractor, Bobcat or any other similar plant. This model is available with either 3-point linkage or skid steer attachment. It is also fitted as standard with fork truck lifting points. Please ask for details of hydraulic requirements. Electric versions are also available.

Purchasing a 3000 series for small scale crushing is a very cost-effective method of avoiding large muck away bills and bought in hardcore costs. Simply move the crusher into position, plug in the hydraulic/electric supply and you are ready to crush in less than 5 minutes.

The 3000 series makes light work of reinforced concrete, brick, porcelain, glass and other aggregate type products.

STANDARD FEATURES

- Jaw aperture of 500mm x 250mm
- Average product size 20mm to 100mm
- Additional product sizes on request
- Choice of Hydraulic or Electrical powered
- Output can be up to 15t – 20t per hour
- Excavator loaded ideally although can be loaded by hand

DIMENSIONS

- Length: 2947mm
- Width: 1295mm
- Loading Height: 1855mm
