

HSM/100-PROFI

Hot cutting and punching machine

Beschreibung

- Hot cutting and punching machine with triple tool carrier and flattening device.
Each tool station can be equipped with customer-specific tools.
All 3 tools can work individually, in parallel and/or subsequently and can be defined accordingly in a program recipe.
For extraordinarily precise dimensions, a motorized pre-driver is installed at the inlet to ensure low and constant stress conditions.
Customizable machine with many options such as e.g. cold cutting knives, punching & slotting tools (hot), marking device, patch defect detection (RGB), rapport detection, metal detection, stacker (1-4x) and much more.

Spezifikationen

- Exchangeable hot cut tool
- Tool station for punching & slotting tools (hot)
- Hot knife length 120mm
- Material width: 10-100mm
- Material thickness: 0,7-4mm
- Flattening device for both cutting edges
- Electronic temperature control
- Material end detection
- Touch terminal with Beckmann HMI
- Length specification by 1mm
- Savable receipts
- Air blowing system for waste pieces
- Piece counter with preset
- Compatibility with remote control unit
- Length tolerances +/- 2mm at 2,000mm
- Many options on request
